

# SAE DIGITAL LIBRARY CASE STUDY

**NAVISTAR®**

**“The Digital Library is the best tool we have to find the most up-to-date J standards that we design to... By having easy access to these standards, engineers do not spend multiple hours trying to find the most up-to-date standard and increase their productivity as a result.”**

**David McCown**  
Navistar

Navistar has been in the truck, bus, and defense vehicle industry for over 100 years, and is a known manufacturer of top brands such as MaxxForce, IC Bus, Workhorse, and the International brand commercial trucks. With the goal to drive economies forward, Navistar recognized their need of **staying current with the industry's standards and best practices.**

Finding the right information resource can be difficult, though. That's why Navistar turned to SAE International's flagship product, the Digital Library. Instead of searching for the latest standards and technical papers all over the internet, they now save time and money by getting all the information they need in one convenient location – via SAE's online Digital Library.

SAE International's Digital Library is the ultimate knowledge source for engineers at Navistar, providing them with instant access to current, trusted information for designing new components, upgrading existing systems, ensuring regulatory compliance, and more. It's clear that SAE's Digital Library can be beneficial to all types of professionals. Navistar engineers with bachelors, masters, and doctorate degrees as well as professional engineers and non-professional engineers alike all use and benefit from SAE's Library.

For engineers in automotive, aerospace and commercial vehicle industries, an SAE Digital Library subscription is the most cost-effective way to access over 130,000 full-text technical papers, standards, ebooks, and magazines from SAE International and other renowned organizations. The robust search engine and user-friendly layout make it easy for researchers to find, download, and share a wealth of current and historical content.

## The Challenge

- Navistar, the leading manufacturer of commercial trucks, buses, defense vehicles, and engines, needed a reliable information resource to access standards in order to maintain regulatory compliance.

## The Solution

- After extensive research, Navistar chose SAE International's Digital Library as their information resource for standards and other industry-specific information.

## The Outcome

- With SAE's Digital Library, Navistar employees were able to easily find the information they needed so their work would be compliant with the latest standards.
